Professional Summary

Full stack developer with hands-on experience building MERN stack applications, REST APIs, and containerized systems using Docker. Delivered an end-to-end ML training platform, and a ticket management system covering React frontends, Node.js and Spring Boot backends, and both SQL and NoSQL databases. Looking for a Software Development Engineer role to build scalable products in a collaborative engineering team.

Technical Skills

Languages: C++, Java, Python, JavaScript, TypeScript, SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Redux
Backend & Frameworks: Node.js, Express.js, Spring Boot, Flask, Hibernate
Databases: MongoDB, MySQL
DevOps & Tools: Git, GitHub, Docker, Docker Compose, Shell Scripting, REST APIs
Concepts: MVC Architecture, Role-Based Access Control, Agile/Scrum, CI/CD, JWT Authentication

Experience

Cravita Cloud Technology

Aug 2025 – Feb 2026

Full Stack Java Developer Intern

Pune, MH

- Built and shipped 5+ reusable React.js frontend components, reducing UI development time by an estimated 20%.
- Developed and integrated 3 REST API endpoints for backend services, improving data retrieval efficiency.
- Assisted in database schema design and integration using MySQL, supporting core application workflows.

Apgama Technologies

Jan 2025 – Jun 2025

Full Stack Web Developer Intern

Pune, MH

- Developed full-stack features using React and Node.js, contributing to 4+ production modules.
- Built and maintained REST APIs integrated with frontend services, reducing manual data handling.
- Identified and resolved 10+ production bugs, improving overall application stability and performance.

Projects

ML Training Platform | *React, Node.js, Python, MongoDB, Docker*

- Built a full-stack platform enabling users to upload datasets, train ML models, and visualize predictions in real time.
- Designed a dual-backend architecture: Node.js for authentication and REST APIs; Python (Flask) for ML inference.
- Implemented role-based access control (RBAC) and an admin dashboard to manage users and models.
- Containerized all services using Docker Compose, enabling one-command local deployment.

React Blog Platform | *React, Appwrite* | GitHub

- Developed a full-featured blog CMS with secure authentication and session management using Appwrite.
- Implemented complete CRUD operations on blog posts with real-time database updates, supporting scalable content management.
- Designed a responsive UI with 10+ reusable React components, reducing code duplication across pages.

Ticket Management System | *Spring Boot, JSP, Hibernate, MySQL* | GitHub

- Built an issue-tracking system allowing users to raise complaints and staff members to resolve them end-to-end.
- Implemented MVC architecture using Spring Boot and Hibernate ORM, ensuring clean separation of concerns.
- Enabled staff-user communication via role-based access control with two distinct permission levels.

Education

Vishwakarma Institute of Technology

2021 – 2025

Bachelor of Technology in Instrumentation Engineering

CGPA: 8.54 / 10

Gandhi City High School & Junior College

2021

Higher Secondary Certificate (HSC)

90.67%

Publications & Certifications

- **e-Yantra Robotics Competition** (eYRC 2023–24) – Qualified GeoGuide Theme, IIT Bombay
- **SIRJANA Journal Publication** (Mar 2024): *Sensor-Based Low-Cost Autonomous Ground Wiper Robot*
